HAND-WIPED GLAZE ON STAIN

Glazing is an artistic, hand finished process that adds depth and dimension to stains and paints. This technique uses a special finish glaze that is applied over the entire stained or painted surface then hand wiped to give it a subtle hued finish creating hang-up of varying tones in detail areas. Our stain glazes include chocolate, a dark brown glaze and shadow, a black glaze.

HEIRLOOM STAIN FINISHES

The Heirloom procedure gives the illusion of time worn stained and painted cabinets. Prior to finishing, doors and drawer fronts receive random hand-applied distress marks, corner and edge over-sanding and rub through. This finish technique will differ from one door to the next, giving each a unique look.

FINISH SAMPLES

When designing your space, order a color block or door sample to see how your favorite finish looks on a specific type of wood.*

Actual product colors may vary from those shown. For actual finish samples, contact your WF Cabinetry dealer or representative. See price book for available door styles.

**Please note that wood naturally expands and contracts with seasonal changes in temperature and humidity. As wood moves at joints, this movement will be more apparent with painted finishes than stained finishes and will look like a small fracture or seam at the joint. This is a natural characteristic of painted finishes on wood.*
